

HALL DES LUMIÈRES NEW YORK

49 CHAMBERS ST. NEW YORK, NY 10007
NYC'S LARGEST PERMANENT DIGITAL ART CENTER

HALL DES LUMIÈRES IS AN UNFORGETTABLE MULTI-SENSORY AND IMMERSIVE ART EXPERIENCE LOCATED INSIDE THE HISTORIC LANDMARK EMIGRANT INDUSTRIAL SAVINGS BANK.

EXPERIENCE ART BEYOND THE FRAME WITH MESMERIZING EXHIBITIONS PROJECTED CONTINUOUSLY OVER 31,000 SQUARE FEET AND SPANNING TWO ENORMOUS LEVELS- EVEN INCLUDING THE RESTORED BANK VAULT!

GROUPS

TOUR WITH IMMERSIVE EXHIBITIONS

Located in Tribeca near Manhattan's City Hall Park, this art exhibition seamlessly showcases legendary works across the Beaux-Arts architecture. 100 projectors map out every square inch and reach 40-foot-high ceilings while a spatialized sound system stimulates your senses.

Halles des Lumières is amazing for all ages and any occasion—from company outings to school field trips.

PRIVATE EVENTS

Historic interiors merged with modern design and technology, creates the perfect setting for private events, weddings, etc. Multi-level floor plan suitable for up to 1000 guests.

Please contact us for private events.

THE IMMERSIVE SPACE EXPERIENCE

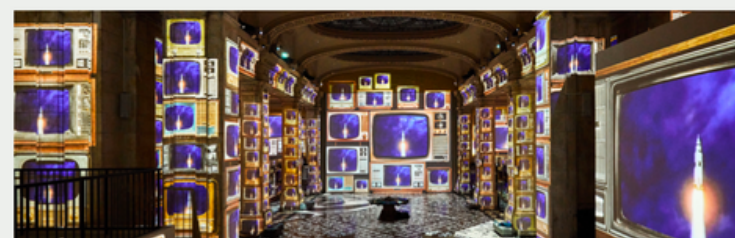

CURRENT EXHIBITION

DESTINATION COSMOS: THE IMMERSIVE SPACE EXPERIENCE
WITH PARTICIPATION FROM NASA

PROLOGUE The Ancient Human Dream of Space Exploration

"Destination Cosmos" begins in darkness. The Hall is filled with a starry sky and lines plot the constellations and bring the mythological creatures to life.

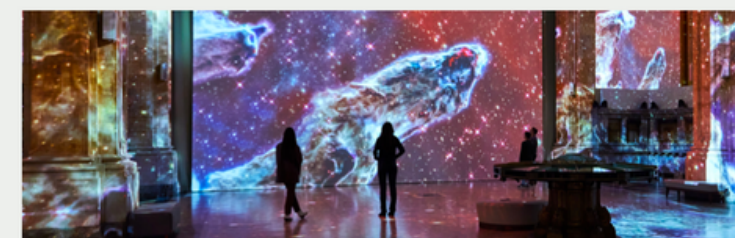

PART 1: THE EARTH

In the heart of Florida, you'll travel over the NASA Kennedy Space Center at Cape Canaveral. Then, see the construction and launch of the first space rocket in the Artemis program in 2022. NASA's new rocket engulfs you in a cloud of smoke and the intense roar of its engines as it rises upward. The curvature of the Earth emerges, followed by a magical view of our planet from space. From the island of Manhattan, to the Himalayan summits and a multitude of landscapes that change with the seasons, we fly over and reflect upon the beauty of our home.

PART 2: THE SOLAR SYSTEM

Next up: the surface of the sun. Magnificent images of solar flares spread over the surface of Hall des Lumières. The dance of the planets around the sun then begins and we visit each planet in the solar system. From the sun, we travel to see Mars in orbit. Once within its atmosphere and we approach its surface, you'll soar through its colorful canyons, craters, and mountains. After flying over Uranus, Neptune, and mysterious trans-Neptunian objects, the adventure continues as we leave the solar system with the Voyager Probe...

PART 3: OUTER SPACE

The Gaia, Planck, and Herschel space observatories scan and map out the sky, creating a ballet of stars, nebulae, and supernovae. The space probe zooms out until the entire Milky Way is visible. The extraordinary images are taken by the James Webb telescope, which operates at 1.5 million kilometers from earth and was launched by NASA in 2021. The Milky Way's luminous point disappears and we plunge into darkness. When the image reappears, an astronaut guides you back to Earth - marking the end of the journey and returning you back home.

OPEN 6 DAYS A WEEK

Sunday-Wednesday,
10 a.m. to 6 p.m.
Tuesday Closed,
Thursday - Saturday,
10 a.m. to 10 p.m.

Last entry is one hour before closing.
Please note hours are subject to change.
